

REPORT

Logistics Analysis Report: Shipment Insights

Overview:

This report provides an in-depth analysis of logistics data, focusing on shipment completion rates, in-progress shipments, shipment values, and delivery times. It is designed to track the performance of completed shipments, the status of in-progress shipments, and insights into customer satisfaction, carrier performance, and delivery metrics across different regions.

The report is split into **three key sections**:

1. **Overview and Shipment Trends**
2. **Shipment Forecasting by Shipping Mode (Jet, Bus, Lorry, Motorbike)**
3. **Customer Experience and Delivery Metrics**

Goal and Objective of the Analysis:

Goal:

The primary goal of this analysis is to provide insights into the logistics performance, identify any inefficiencies, and provide actionable recommendations to optimize shipment completion and in-progress shipments. The report aims to help stakeholders understand the trends, value, and customer satisfaction levels related to the delivery process, as well as the impact of different delivery modes, to determine whether shipments arrived as and when due or not.

Objectives:

1. Measure the completed shipments by various transport modes and track their trends over months and years.
2. Analyze the value of shipments, including any fluctuations in shipment value over time and by transport mode.
3. Break down shipment performance by region, particularly tracking expected shipments in each city for each transport mode.
4. Assess customer satisfaction based on shipment performance, delivery time, and feedback on different shipment types.
5. Highlight areas where improvements can be made in logistics efficiency, such as reducing delivery time or improving customer satisfaction.

Page 1: Overview of Shipment Status

Key Insights:

Completed Shipments:

- Total **completed shipments** stand at **16.74K**, with a **25% increase** compared to the previous year.
- The **value** of completed shipments is **\$11.32M**, with a **25% increase** from the previous year.
- The **average shipment time** is **9.7 days**, with **Jets** having the fastest delivery time at **10.1 days**, and **Motorbikes** being the slowest at **9.9 days**.

In Progress Shipments:

- **47.46K shipments** are still in progress, with a **25% increase** compared to last year.
- **High priority** shipments account for the highest proportion of in-progress deliveries.

Shipment Trend Analysis:

- The report also highlights trends over the months and years, giving insights into the growth and challenges in **shipment deliveries**.

Page 2: Shipment Forecasting by Shipping Mode

Key Insights:

Jet Shipments:

- **11,775 shipments** are expected to be delivered by **Jet**, with **High priority** shipments accounting for **4,002** of the deliveries.

Bus Shipments:

- A total of **10,861 shipments** are expected to be delivered by **Bus**, with **Medium priority** shipments accounting for **3,602** deliveries.

Lorry Shipments:

- **12,604 shipments** are expected to be delivered by **Lorry**, with **4,430** being **Low priority** shipments.

Motorbike Shipments:

- **12,224 shipments** are expected to be delivered by **Motorbike**, with **Medium priority** shipments accounting for **4,443** deliveries.

Regional Breakdown:

- Each transportation mode has its shipments distributed across different regions, including **Lagos, Abuja, Port Harcourt**, and more. The analysis helps identify key **regional shipment trends** and **delivery performance**.

Page 3: Customer Experience and Delivery Metrics

Key Insights:

Customer Type Breakdown:

- **Business** customers account for **35.99%** of completed shipments, followed by **Retail** and **International** customers at **32.85%** and **31.16%** respectively.

Shipment Status:

- **Shipment status** metrics track various statuses such as **In Transit, Ready for Pickup, Completed**, etc. The **priority levels** help evaluate which shipments need immediate attention.

Satisfaction Level:

- **Customer satisfaction** is tracked for each shipment, with metrics like **Very Satisfied, Neutral**, and **Unsatisfied** reflecting the **service quality**.
- **Shipment Value** and **Delivery Time** are crucial factors in customer satisfaction, with high-value shipments and longer delivery times potentially impacting satisfaction levels.

Payment and Rating:

- The **payment status** (paid or pending) and **delivery rating** are tracked to correlate how the **payment status** impacts **customer satisfaction**.

Conclusion:

This comprehensive Logistics Analysis Report allows stakeholders to get a clear picture of shipment performance, identify priority issues, and take action to improve logistics efficiency. The insights gained from this analysis can assist in enhancing shipment delivery timelines, optimizing transportation modes, and improving customer satisfaction.

Key Recommendations:

- Focus on improving the delivery times for Motorbike and Lorry shipments.
- Prioritize high-value and high-priority shipments to ensure they are delivered promptly.
- Use the regional insights to optimize shipment routes and carrier performance.
